CITC Technical Specification

Document Number: AI003
Revision: Issue 2
Date: 10/01/2010 G

Specification for Equipment connecting to ADSL, ADSL2 and ADSL2+ Services

Issued by The Communications and Information Technology Commission of Saudi Arabia in accordance with article 89 of the Telecommunications Bylaw.

Scope

This document applies to terminal equipment which includes interfaces that may be connected to ADSL, ADSL2 and ADSL2+ services offered by public network operators in the Kingdom of Saudi Arabia.

All telecommunications and radio terminal equipment must comply with the relevant technical specifications established by CITC. In addition, such equipment may be subject to regulations for Declaration of Conformity or registration. See http://www.citc.gov.sa/ for details.

If more than one interface type is offered by a piece of equipment, each interface must meet the applicable technical specifications.

The requirements in this specification limit the disturbance of ADSL services to the voiceband PSTN service provided on the same physical circuit and to services operating at higher frequencies provided on different circuits. Where more than one interface type is offered by a piece of equipment, each interface must meet the applicable National Specifications.
Equipment covered by this specification includes, but is not limited to the Analogue PSTN interfaces of the following equipment types:

<table>
<thead>

<tbody>
<tr>
<td>ADSL Splitter devices</td>
<td>For direct connection to the ADSL line circuit.</td>
</tr>
<tr>
<td>ADSL Modems</td>
<td>For direct connection to the ADSL line circuit or indirect connection via an ADSL line splitter.</td>
</tr>
<tr>
<td>Other equipment</td>
<td>For direct connection to the ADSL line circuit or indirect connection via an ADSL line splitter.</td>
</tr>
</tbody>
</table>

**Entry into force**

This specification shall enter into force on 10/01/2010 G

**Proof of compliance**

It is recommended that test reports are obtained from a laboratory that has been accredited by a body that is a member of the ILAC Mutual Recognition Arrangement.

**Technical requirements**

Testing should be carried out to ensure compliance with the following specifications as appropriate:

**Technical Requirements to limit disturbance to Voiceband Services:**

**ES 202 913**
Access and Terminals (AT); POTS requirements applicable to ADSL modems when connected to an analogue presented PSTN line

**TS 101 952-1-1**
Access network xDSL transmission filters; Part 1: ADSL splitters for European deployment; Sub-part 1: Specification of the low pass part of ADSL/POTS splitters

**TS 101 952-1-2**
Access network xDSL transmission filters; Part 1: ADSL splitters for European deployment; Sub-part 2: Specification of the high pass part of ADSL/POTS splitters
Power Spectral Density in the 0 to 4 KHz band.
(G.992.1 cl. A.2.4.2.1)

The total power in the voiceband (0 Hz to 4 kHz) shall not exceed 15 dBm.

The power spectral density in the range 0 to 4 kHz shall not exceed -97.5 dbm/ Hz.

Technical requirements to limit disturbance to services operating at frequencies above the voiceband service.

If no issue or revision number is quoted along with the title of a technical specification, the latest published version should be used.

Power Spectral Density (PSD).
ADSL equipment shall operate within the specified upstream PSD mask (see Table 1) to prevent interference to other services.

Aggregate transmit power
The Upstream aggregate transmit power for an ADSL equipment shall not exceed the limits specified in Table 1.

Table 1 Power Spectral Density and aggregate power limits for ADSL equipment.

If no issue or revision number is quoted along with the title of a technical specification, the latest published version should be used.
Additional requirements
ADSL equipment should not affect the performance of the analogue PSTN. Reference should also be made to CITC specification AI001"Requirement for equipment which may connect to the Analogue PSTN” in order to understand any additional requirements which apply.

Obtaining technical standards
ETSI technical standards may be obtained free of charge for individual use from the ETSI website www.etsi.org.

Network information (only for network interfaces)
Further information on the characteristics and presentation of network interfaces can be found by visiting operator's website.
