CITC Technical Specification

Document Number: RI003
Revision: Issue 2
Date: 10/01/2010 G

Specification for Paging Terminals and Ancillary Equipment

Issued by The Communications and Information Technology Commission of Saudi Arabia in accordance with article 89 of the Telecommunications Bylaw.

Communications and Information Technology Commission

Contents
This document comprises the following sections:

Scope ............................................................................................................... 2
Entry into force ............................................................................................... 2
Characteristics of current one way Paging formats ........................................ 2
Frequency of operation ................................................................................... 3
Proof of compliance ....................................................................................... 3
Technical requirements ................................................................................ 3
Additional requirements ............................................................................... 4
Obtaining technical standards ...................................................................... 4
Network information (only for network interfaces) ....................................... 4
Document history ........................................................................................ 4

Scope
This document applies to Paging Terminals and Ancillary Equipment.

All telecommunications and radio terminal equipment must comply with the relevant technical specifications established by CITC. In addition, such equipment may be subject to regulations for Declaration of Conformity or registration. See http://www.citc.gov.sa/ for details.

If more than one interface type is offered by a piece of equipment, each interface must meet the applicable technical specifications.

Entry into force
This specification shall enter into force on 10/01/2010 G

Characteristics of current one way Paging formats

<table>
<thead>
<tr>
<th>Protocol</th>
<th>Data Rate</th>
<th>Channel</th>
<th>Modulation</th>
</tr>
</thead>
<tbody>
<tr>
<td>FLEX</td>
<td>6400 bps</td>
<td>25 kHz</td>
<td>2 FSK, 4 FSK</td>
</tr>
<tr>
<td>ERMES</td>
<td>6250 pps</td>
<td>25 kHz</td>
<td>4 FSK</td>
</tr>
</tbody>
</table>
**Frequency of operation**

Following table is showing information on frequency bands, maximum output power and applicable specifications:

<table>
<thead>
<tr>
<th>Frequency band</th>
<th>Maximum Output Power or Magnetic Field</th>
<th>ETSI Standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>136.0000 – 174.0000 MHz</td>
<td>*</td>
<td>EN 300 224</td>
</tr>
<tr>
<td>169.4125 – 169.8125 MHz</td>
<td>*</td>
<td>EN 300 133</td>
</tr>
<tr>
<td>440.0000 – 470.0000 MHz</td>
<td>*</td>
<td>EN 300 224</td>
</tr>
</tbody>
</table>

* Frequency bands will be allocated for use by CITC’s Spectrum Affairs department on a case-by-case basis.

**Proof of compliance**

It is recommended that test reports are obtained from a laboratory that has been accredited by a body that is a member of the ILAC Mutual Recognition Arrangement.

**Technical requirements**

Testing should be carried out to ensure compliance with the following specifications:

**EN 300 133-4**  
Electromagnetic Compatibility and Radio Spectrum Matters (ERM); Enhanced Radio Messaging System (ERMES); Part 4: Air interface specification.

**EN 300 224-2**  

**EN 301 489-1**  
Electromagnetic compatibility and Radio spectrum Matters (ERM); Electromagnetic Compatibility (EMC) standard for radio equipment and services; Part 1: Common technical requirements.

**EN 301 489-2**  
Electromagnetic compatibility and Radio spectrum Matters (ERM); Electromagnetic Compatibility (EMC) standard for radio equipment and services; Part 2: Specific condition for Radio Paging Equipment.
If no issue or revision number is quoted along with the title of a technical specification, the latest published version should be used.

**General**
In addition to meeting the above requirements, all equipment must comply with the requirement of CITC specification GEN001, be safe and must not adversely affect other electrical equipment.

**Additional requirements**
No additional requirements exist for Paging terminals and ancillary equipment at this time.

**Obtaining technical standards**
ETSI technical standards may be obtained free of charge for individual use from the ETSI website www.etsi.org.

**Network information (only for network interfaces)**
Further information on the characteristics and presentation of network interfaces can be found by visiting operator's website.

**Document history**
