CITC Technical Specification

Document Number: RI089
Revision: Issue 1
Date: 10/01/2010 G

Specification for Powerline Equipment

Issued by The Communications and Information Technology Commission of Saudi Arabia in accordance with article 89 of the Telecommunications Bylaw.

Communications and Information Technology Commission
King Fahad Highway

Contents
This document comprises the following sections:

Scope............................................................................................................... 2
Entry into force ............................................................................................... 2
Frequency of operation ................................................................................... 2
Proof of compliance........................................................................................ 2
Technical requirements................................................................................... 3
Additional requirements ................................................................................. 3
Obtaining technical standards......................................................................... 3
Document history............................................................................................ 3

Scope
This document applies to Powerline Equipment.

All telecommunications and radio terminal equipment must comply with the relevant technical specifications established by CITC. In addition, such equipment may be subject to regulations for Declaration of Conformity or registration. See http://www.citc.gov.sa/ for details.

If more than one interface type is offered by a piece of equipment, each interface must meet the applicable technical specifications.

Entry into force
This specification shall enter into force on 10/01/2010 G

Frequency of operation
Following table is showing information on frequency bands, maximum output power and applicable specifications:

<table>
<thead>
<tr>
<th>Frequency band</th>
<th>Maximum Output Power or Magnetic Field</th>
<th>CENELEC Standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.6 MHz - 30 MHz</td>
<td>-50 dBm/Hz</td>
<td>EN 55022</td>
</tr>
<tr>
<td></td>
<td></td>
<td>EN 50412-2-1</td>
</tr>
</tbody>
</table>

Proof of compliance
It is recommended that test reports are obtained from a laboratory that has been accredited by a body that is a member of the ILAC Mutual Recognition Arrangement.
Technical requirements
Testing should be carried out to ensure compliance with the following specifications:

**EN 55022**
Information technology equipment — Radio disturbance characteristics — Limits and methods of measurement (CISPR 22).

**EN 50412-2-1**
Power line communication apparatus and systems used in low-voltage installations in the frequency range 1.6 MHz to 30 MHz Part 2-1: Residential, commercial and industrial environment Immunity requirements.

General
In addition to meeting the above requirements, all equipment must comply with the requirement of CITC specification GEN001, be safe and must not adversely affect other electrical equipment.

Additional requirements
Power line equipment imported into Saudi Arabia should be approved by a recognized industry alliance, such as HomePlug, Universal Powerline Association (UPA), HD-PLC.

Obtaining technical standards
CENELEC technical standards may be obtained for cost from www.cenelec.org.
