CITC Technical Specification

Document Number: RI112
Revision: Issue 1
Date: 01/08/2016 G

Specification for VHF Maritime and Ancillary Equipment

Issued by The Communications and Information Technology Commission of Saudi Arabia in accordance with article 89 of the Telecommunications Bylaw.

Alnakheel Quarter
Riyadh

Telephone: + 966 11 461 8000
E-mail: info@citc.gov.sa

Contents
This document comprises the following sections:

Scope.................................................................2
Entry into force .......................................................2
Frequency of operation ..........................................2
Proof of compliance ..............................................2
Technical requirements ..........................................3
Additional requirements .........................................4
Obtaining technical standards ....................................4
Network information (only for network interfaces) ..........4
Document history.........................................................4

Scope
This document applies to VHF Maritime and Ancillary Equipment.

All telecommunications and radio terminal equipment must comply with the relevant technical specifications established by CITC. In addition, such equipment may be subject to regulations for Declaration of Conformity or registration. See http://www.citc.gov.sa/ for details.

If more than one interface type is offered by a piece of equipment, each interface must meet the applicable technical specifications.

Entry into force
This specification shall enter into force on 01/08/2016 G

Frequency of operation
Following table is showing information on frequency bands, maximum output power and applicable specification:

<table>
<thead>
<tr>
<th>Frequency band</th>
<th>Maximum Output Power</th>
<th>ETSI Standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>156 -162.025</td>
<td>25 W</td>
<td>EN 301 178-2</td>
</tr>
<tr>
<td></td>
<td></td>
<td>EN 300 162-2</td>
</tr>
<tr>
<td></td>
<td></td>
<td>EN 301 025-2</td>
</tr>
<tr>
<td></td>
<td></td>
<td>EN 302 885-2</td>
</tr>
</tbody>
</table>

Proof of compliance
It is recommended that test reports are obtained from a laboratory that has been accredited by a body that is a member of the ILAC Mutual Recognition Arrangement.
Technical requirements

Testing should be carried out to ensure compliance with the following specifications:

EN 301 178-2
Electromagnetic compatibility and Radio spectrum Matters (ERM); Portable Very High Frequency (VHF) radiotelephone equipment for the maritime mobile service operating in the VHF bands (for non-GMDSS applications only); Part 2: Harmonized EN covering essential requirements of article 3.2 of the R&TTE Directive

EN 300 162-2
Electromagnetic compatibility and Radio spectrum Matters (ERM); Radiotelephone transmitters and receivers for the maritime mobile service operating in VHF bands; Part 2: Harmonized EN covering essential requirements of article 3.2 of the R&TTE Directive.

EN 300 162-3
Electromagnetic compatibility and Radio spectrum Matters (ERM); Radiotelephone transmitters and receivers for the maritime mobile service operating in VHF bands; Part 3: Harmonized EN covering essential requirements of article 3.3 (e) of the R&TTE Directive.

EN 301 025-2
Electromagnetic compatibility and Radio spectrum Matters (ERM); VHF radiotelephone equipment for general communications and associated equipment for Class "D" Digital Selective Calling (DSC); Part 2: Harmonized EN covering the essential requirements of article 3.2 of the R&TTE Directive.

EN 301 025-3
Electromagnetic compatibility and Radio spectrum Matters (ERM); VHF radiotelephone equipment for general communications and associated equipment for Class "D" Digital Selective Calling (DSC); Part 3: Harmonized EN covering the essential requirements of article 3.3(e) of the R&TTE Directive.

EN 302 885-2
Electromagnetic compatibility and Radio spectrum Matters (ERM); Portable Very High Frequency (VHF) radiotelephone equipment for the maritime mobile service operating in the VHF bands with integrated handheld class D DSC; Part 2: Harmonized EN covering the essential requirements of article 3.2 of the R&TTE Directive.

EN 302 885-3
Electromagnetic compatibility and Radio spectrum Matters (ERM); Portable Very High Frequency (VHF) radiotelephone equipment for the maritime mobile service operating in the VHF bands with integrated handheld class D DSC; Part 3: Harmonized EN covering the essential requirements of article 3.3(e) of the R&TTE Directive.
EN 301 843-1

EN 301 843-2
Electromagnetic compatibility and Radio spectrum Matters (ERM); ElectroMagnetic Compatibility (EMC) standard for marine radio equipment and services; Part 2: Specific conditions for VHF radiotelephone transmitters and receivers.

If no issue or revision number is quoted along with the title of a technical specification, the latest published version should be used.

General
In addition to meeting the above requirements, all equipment must comply with the requirement of CITC specification GEN001, be safe and must not adversely affect other electrical equipment.

Additional requirements
A license from CITC must be obtained before equipment of this type can be used in KSA. Details of additional requirements which apply to the use of maritime VHF Equipment can be found on the CITC website www.citc.gov.sa under the spectrum management heading.

Obtaining technical standards
ETSI technical standards may be obtained free of charge for individual use from the ETSI website www.etsi.org.

Network information (only for network interfaces)
Further information on the characteristics and presentation of network interfaces can be found by visiting operator's website.
